Enhancing Future VTOL (AAM) usage in the UAE

Chair – David Holmes, Vice Chair ICAAMS 4

Panel – Mike Hirschberg USA, Somen Chowdhury and UAE Keynote Presenters

Coordinators - TBA

The Workshop aims to provide a platform to all stakeholders from the field of research & development to manufacturers, regulators, operators, and other leaders in the industry to discuss the present status of limited use of the helicopters in the West/Central/Southeast Asia and Australia Region and its associated issues and challenges.

As future Advanced Air Mobility (AAM) aircraft are likely to share the airspace with helicopters and are likely to be operated under similar regulations, the present problems facing the helicopter industry are likely to be carried forward to future AAM operations. The Workshop will discuss how we can ensure the smooth induction and operationalization of the new platforms while ensuring that the regulatory and operational hurdles are overcome to allow AAM to fulfill its promise as a gamechanger for society.

The Workshop will also highlight the global status of the efforts by various stakeholders in AAM. This includes the design and development, standards & certification, airspace management and operationalization of the AAM platforms. The Workshop will discuss the challenges which the industry is likely to face as we embrace new concepts and technology.

The outcome of the Workshop will help generate ideas to develop a generic “AAM Roadmap” for the West/Central/Southeast Asia and Australia region, in the immediate future by the relevant authorities to enhance the usage of not only its present helicopter fleet, but also the expected introduction of AAM platforms, by customization of the roadmap.

Friday – 04 Dec 26

Tour – Desert Safari (Tentative)

Coordinator –xxxxx, VFS UAE Chapter

Guides – xxxxxxxx

This tour being planned is across the desert of Dubai with several stops for photography. During an exciting dune drive your first destination is to be a beautiful sunset. Watch the sunset and continue with Dune bashing to finally reach a campsite. Here you can do a camel ride, sand boarding and try out a henna design on hand or feet. After working up an appetite you get to enjoy a delicious barbecue dinner and shisha (the famous Arabic water pipe). You also get to enjoy Fire show and Tanura show performance around the campfire by starlight.
